## **BPO Management Services IT Outsourcing Business Unit, Blue Hill Data Services, Inc., Partners with Global Interface Solutions, Inc. dba SecureAgent Software Corporation to Protect Sensitive Customer Data**

November 9, 2009

ANAHEIM, Calif.--(BUSINESS WIRE)--BPO Management Services, Inc., "BPOMS" (OTCBB:HAXS), a full-service business process outsourcing company focused on serving middle-market enterprises, announced that its IT Outsourcing (ITO) Solutions unit, Blue Hill Data Services, has partnered with SecureAgent Software, a designer and producer of security-driven software, to utilize its Secure Data Solution product, a high-level virtual tape encryption software solution.

The Secure Data Solution<sup>®</sup> emulates and encrypts tape images with the highest level of encryption. Tape data is kept safe, and sensitive information is inaccessible to outsiders, by not transmitting the encryption keys with the virtual tape data. Eliminating or minimizing the necessity for physical tapes, as well as securing the information stored as a virtual tape image, lessens the risk of lost or stolen data.

The Secure Data Solution provides an easy-to-install, easy-to-use way of securing and sending tape data and cost-effectively moving to an advanced data backup and security system in the future. The Secure Data Solution integrates seamlessly with mainframe systems, encrypting tape images without adding load to the host CPU or disrupting the operator's work.

The Secure Data Solution is comprised of hardware and software modules, including tape emulation, remote storage, library control, tape control, and storage control that can be easily customized and yet allow for easy scaling and future expansion. This solution is very much in keeping with today's corporate green initiatives, greatly reducing the physical space requirements, and supporting environmentalists such as power and light, typically associated with older technology.

"The Secure Data Solution allows us to leverage virtual tape technology across all platforms that we support; mainframe, mid-range and open systems. Additionally, we can create encrypted data files for mainframe customers on LT04 media, which is normally not supported in a mainframe environment. For our disaster recovery solution we transmit the encrypted backup files to a disaster recovery facility which allows for a more aggressive Recovery Time Objective (RTO)," commented Thomas Laudati, Chief Technology Officer, Blue Hill Data Services, Inc.

"SecureAgent values the partnership with Blue Hill and is looking forward to working with them in introducing their customers to the many benefits the Secure Data Solution offers. The solution virtualizes, compresses and encrypts data that is sent off-site for archival and disaster recovery purposes and is a proven winner in driving enhanced efficiencies and excellent cost savings that results in a very attractive ROI to a company's bottom line. This collaboration between SecureAgent and Blue Hill will allow for Blue Hill's customers to integrate the Secure Data Solution into their operations in a non-intrusive, seamless manner," said John Sawyer, Vice-President of Sales of SecureAgent Software.

### **About SecureAgent Software**

Global Interface Solutions, Inc. dba SecureAgent Software is a corporation based in Tulsa, Oklahoma. SecureAgent Software designs and produces security-driven software for enterprise management of computer systems and networks, electronic communications and secure document transfer (e-mail and files), and e-commerce and website management.

**Forward-Looking Statements**

Certain statements in this press release that are not historical facts are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements may be identified by the use of words such as "anticipate," "believe," "expect," "future," "may," "will," "would," "should," "plan," "projected," "intend," and similar expressions. Such forward-looking statements, involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of BPO Management Services, Inc. (the "Company") to be materially different from those expressed or implied by such forward-looking statements. The Company's future operating results are dependent upon many factors, including but not limited to: (i) the Company's ability to obtain sufficient capital or a strategic business arrangement to fund its current operational or expansion plans; (ii) the Company's ability to build and maintain the management and human resources and infrastructure necessary to support the anticipated growth of its business; (iii) competitive factors and developments beyond the Company's control; and (iv) other risk factors discussed in the Company's periodic filings with the Securities and Exchange Commission, which are available for review at <http://www.sec.gov> under "Search for Company Filings."

**Safe Harbor Statement**

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995: With the exception of historical or factual information, the matters discussed in this press release, including without limitation the acceptance of new technology by the general marketplace, the Company's future growth plans and the ability of the Company's common stock to trade or be quoted on various markets are forward-looking statements that involve risks and uncertainties. Actual results may differ. Factors that could cause or contribute to such differences in results include, but are not limited to, the availability of financing and changes in market and business conditions; and other risks and factors detailed from time to time in the Company's public statements and its periodic reports and other filings with the U.S. Securities and Exchange Commission.
